3 Inexpensive VPS Hosting That You Should Know in 2019
(90%) Votes

For website owners who want more or want to take advantage from their web host but cannot manage to pay for those high prices. 😊

Then a virtual private server is an excellent middle ground solution between a dedicated and shared hosting. It is good to stress that virtual private server hosts place lesser websites on each server.

Meaning, you get to have more storage space and faster speeds for low-cost rates. So, whether you are looking to start a business website or outgrowing shared hosting, a virtual private server is undoubtedly worth considering.

It is absolutely possible to get hosted on a virtual private server for an affordable price and still enjoy helpful features from your provider. For a little help, here's a list of 3 inexpensive and affordable VPS hosting that are worth considering.

MilesWeb

A screenshot of the MilesWeb website homepage. The header features the MilesWeb logo with the tagline "Your Hosting, Our Responsibility!" and navigation links for "Web Hosting" (with a "Free Domain" badge), "Reseller" (with a "40% Off" badge), "WordPress", "Servers", "Cloud", "Meet Us", and "Deals" (with a "Hot" badge). The main content area has a dark background with the headline "India's Best Web Hosting Company" and the subtext "Everything you need to build, host and manage a website is available at just ₹99/mo". Below this are four feature icons: "Unlimited Space & Bandwidth" (server rack icon), "Lifetime Free Domain" (globe icon), "Free SSL Certificate" (lock icon), and "Excellent Service" (award ribbon icon). On the left is a "Readers' Choice Award 2016" badge from HostReview. A green "Get Started" button is centered at the bottom. A "We Are Here!" chat bubble is in the bottom right corner.

MilesWeb is, for the most part, one of the popular web hosting providers in India. It has been providing web hosting services since 2012.

MilesWeb's objective, as to what they say, is to give a reliable, simple, and fast hosting service to everyone. Undoubtedly, robust customer support is most probably one of its significant merits.

They offer not only virtual private server hosting, but also reseller hosting, cloud hosting, common hosting, and dedicated servers hosting. But take note that there are two kinds of MilesWeb virtual private server hosting.

So, firstly, the Linux VPS servers, which is managed or handled, and offered by Digital ocean. The prices kicks off at \$12 and the servers are situated in Toronto, Amsterdam, Frankfurt, Singapore, Bangalore, London, San Francisco, and New York.

The second type of MilesWeb VPS hosting is the Windows virtual private servers, which is handled by KVM virtualization. And the servers are only situated in India. The prices kicks off at \$16.

Features:

- Server by AWS and Digital ocean
- Cpanel or Plesk
- Free VPS Migration
- SSD Storage
- Cloud Infrastructure
- Full Access to Root
- Managed VPS
- KVM Virtualization

DreamHost

With at least 400,000 customers, this web hosting provider has over twenty years of business life. With this experience, DreamHost has achieved an excellent reputation. In fact, WordPress.org officially recommends this hosting provider.

DreamHost offers cloud computing, dedicated servers, VPS hosting, WordPress, and shared hosting. The DreamHost virtual private servers are only offered and managed on Linux.

They guarantee 24/7 customer support, unlimited bandwidth, and 100 percent uptime. The prices kicks off at \$ 13.75.

If you're looking for a great virtual server to purchase, this hosting provider's VPS hosting is absolutely worth to consider. This is essentially true if you want to leverage WordPress as they have a robust cooperation with CMS.

Features:

- Ubuntu OS
- Cheap Linux VPS hosting
- SSD Server
- Cloud Computing
- Fully managed VPS servers
- 100% uptime guarantee
- Specialized in WordPress
- Unlimited bandwidth
- 24/7 customer support

1&1 IONOS

The screenshot shows the 1&1 IONOS website. At the top, there's a dark blue header with the 1&1 IONOS logo on the left and navigation links for 'Products', 'Solutions', 'More', and 'Sign in' on the right. The main content area has a large blue banner with the text: '.com Domain + Personal Consultant \$1 for the 1st year' (then \$15/year). Below this is a search bar with the placeholder text 'Enter your desired web address' and a 'Check' button. Underneath the banner, there are two promotional cards. The left card is for 'Web Hosting + Personal Consultant' and shows a price of '12 months from \$1 /month then \$8/month'. The right card is for 'Website Builder + Personal Consultant' and shows a price of '12 months from \$1 /month then \$10/month'. Both cards include small images of people working on laptops.

1&1 IONOS is located in the United States and started operating in 2003. Undoubtedly, it is a web hosting provider with lots of experience in the field. They offer domain registration, website builder, dedicated servers, VPS, website hosting, and many more.

For those people who want to purchase affordable VPS, 1&1 IONOS is most probably the right option. The prices kick off at \$5. Moreover, operating systems can be Linux or Windows. Also, you can select the server between Germany, Spain, and United States.

If you happen to be in Europe, Asia, or United States, this hosting provider is undoubtedly to be helpful, with unlimited traffic and free SSL.

Features:

- Data Centers in Spain, Germany, and United States
- 9% uptime
- 24/7 customer support

- Linux or Windows server
- Free SSL certificate
- Vmware Virtualization
- Unlimited traffic
- Full Access to Root
