What is Creativity?

In school, some people draw unbelievable pictures some write good stories some are experts in other fields they were considered as special ones or you can say creative people but according to research every person is creative everyone has its creativity.

In fact, creativity is one of the most important characteristics of a human being. It is the main aspect of person's life because when a person knows for what he/she has been created or when he/she knows it's the creativity it can take you to next level of success, for example, some people are good at doing singing some are good at acting some are good in other fields by using their creativity at right place they can be a very successful person in the world.

If you think you are not provided with any creative thing then don't worry there are many things you can learn by yourself. There are some institutions that help you to do creative work like if you want to make a logo of anything there are some [logo design services](#) that can help you to do. The astonishing thing is how easy it is with the right techniques to get people who think they have no creativity at all to do very innovative and imaginative work.

Why Creativity Important in Our Daily Life:

Creativity Predicts a Longer Life:

Researchers found that only creativity not intelligence or overall openness decreased mortality risk. One possible reason is to be creative that it is protective for our health because it is connected to our neural networks inside the brain. Not only can being creative help you live longer, but it can help you to maintain your health and life quality.

Solve Problems:

Being a creative person helps you to solve problems in a better way. We know most of the people solve problems but they all are not creative. For example, some people have same problems everyone tries to solve it but everyone takes their time everyone will try to solve it in their own way so creative are those who can solve the problem in an easy way or an unexpected way most of the time it takes too less time to solve it.

Creativity helps you see things differently and better deal with uncertainty. Studies show that creative people are better able to live their life with unexpected things because they can adapt their thinking to allow for the flow of the unknown. To live a creative life we must lose our fear of being wrong or we have to stop thinking about what people will say or anything else.

Develop Confidence:

Being creative comes with many flaws and a high risk of failure. You have to be limitless and willing to take risks that what you create may never see the light of the day. Engaging in the creative process is a great confidence builder because you will understand that failure is also part of life. Once you understand failure also helps you do something better next time then it will free you from any type of fear and it will allow you to do new things even at the risk of failing.

Importance of Creativity in Professional Life:

Creativity is also important in our professional life because it helps us to make our profession better than others. For Example Apple, Apple is a company synonymous with creativity, it's a brand that always thinks differently from others and also encourages other companies to think like this. Simply Apple logo has proven to spark creativity. Their way of mirroring how they perceive the brand. Also, you can learn from iPhones Apple company releases it's mobile or any gadgets mostly after a year that's their creative think because they know people eagerly wait for their product and when their products come in market after some years it breaks all the records from other companies.

Organizations today operate in a highly competitive, global environment, making creative thinking. Creativity is what fuels big ideas, challenges employees to think something new which helps them to open the door to new opportunities.

Creativity is different because creativity is a mechanism for being innovative. Creativity in the profession is a crucial first step that needs to be prioritized by senior leadership. Creativity is ranked as the number one factor which helps you to make a successful future or successful business. 😊
